Purpose

- 1.1 This policy supports the controlled storage and transfer of information by Councillors, employees, volunteers, contractors, and other authorised users who have access to and use of computing equipment that is owned or leased by Fakenham Town Council.
- 1.2 This policy must be read in conjunction with the Council's IT Policy, particularly Sections 4, 6, 8 and 11, which set out requirements relating to device security, encryption, password management, remote working and misuse.
- 1.3 Information is used throughout the Council and is sometimes shared with external organisations and applicants. The use of removable media may result in the loss of the ability to access information, or interference with the integrity of information, which could have a significant effect on the efficient operation of the Council and may result in financial loss and an inability to provide services to the public.
- 1.4 It is therefore essential for the continued operation of the Council that the availability, integrity and confidentiality of all storage devices are maintained at a level which is appropriate to the Council's needs.
- 1.5 The aims of the policy are to ensure that the use of removable storage devices is accomplished with due regard to:
 - 1.5.1 Enabling the correct data to be made available where it is required
 - 1.5.2 Maintaining the integrity of the data
 - 1.5.3 Preventing unintended consequences to the stability of the computer network
 - 1.5.4 Building confidence and trust in data that is being shared between systems
 - 1.5.5 Maintaining high standards of care towards data and information about individual parishioners, staff or information that is exempt from disclosure
 - 1.5.6 Compliance with legislation, policies or good practice requirements
- 1.6 This policy forms part of the Council's Digital Governance Framework and must be read in conjunction with the following related policies:
 - IT Policy (Core Digital Governance Framework)
 - Information Transfer Policy
 - Councillor Email Policy
 - Social Media and Communications Policy
 - Data Protection Policies
 - Records Management and Retention Policy
 - Members' Code of Conduct

The IT Policy provides the overarching framework for digital security, acceptable use, monitoring, and incident management. Supporting policies provide operational or role-specific guidance and must not contradict the IT Policy.

Where overlap exists between policies, the requirements of the IT Policy shall take precedence.

Failure to comply with any of the above policies may result in formal action in accordance with the Council's disciplinary procedures and, where applicable, statutory obligations under the UK General Data Protection Regulation (UK GDPR), the Data Protection Act 2018, and the Freedom of Information Act 2000.

2 Principles

- 2.1 This policy sets out the principles that will be adopted by the Council in order for material to be safely stored on removable media so that the risk of loss or corruption to work data is low.
- 2.2 Removable media includes but is not limited to:
USB memory sticks, memory cards, portable memory devices, CD / DVDs, diskettes and any other device that transfers data between systems, or stores electronic data separately from email or other applications.
- 2.3 Any person who intends to store Council data on removable media must abide by this Policy. This requirement devolves to Councillors, employees, volunteers, contractors, and other authorised users of the Council, who may be held personally liable for any breach of the requirements of this policy.
- 2.4 Failure to comply with this policy could result in disciplinary action.

3 Advice and Assistance

- 3.1 The Clerk will ensure that everyone that is authorised to access the Council's information systems is aware of their obligations arising from this policy.
- 3.2 A competent person should be consulted over any hardware or system issues. Advice and guidance on using software packages should be also sought from a competent person.

4 Responsibilities

- 4.1 The Clerk is responsible for enforcing this policy and for having arrangements in place to identify the location of all data used in connection with Council business.
- 4.2 Users of removable media must have adequate Records Management / Information Security training so that relevant policies are implemented.

5 Incident Management

- 5.1 It is the duty of all Councillors, employees, volunteers, contractors, and other authorised users of the Council to not allow storage media to be compromised in any way whilst in their care or under their control. There must be immediate reporting of any misuse or irresponsible actions that affect work data or information, any loss of material, or actual, or suspected breaches in information security to the Clerk.

- 5.2 All Councillors, employees, volunteers, contractors and other authorised users must cooperate fully with any investigation into an information security incident and take any reasonable steps required by the Council to minimise the impact of the incident and prevent any further compromise.
- 5.3 All information security incidents must be managed in accordance with the Council's IT Policy, which sets out the Council's requirements for reporting, recording, investigating, escalating and responding to actual or suspected information security incidents.

6 Data Administration

- 6.1 Removable media should not be the only place where data created or obtained for work purposes is held, as data that is only held in one place and in one format is at much higher risk of being unavailable through loss, destruction or malfunction of equipment, than data which is routinely backed up.
- 6.2 Where removable media is used to transfer material between systems then copies of the data should also remain on the source system or computer, until the data is successfully transferred to another computer or system.
- 6.3 Where there is a business requirement to distribute information to third parties, then removable media must only be used when the file cannot be sent or is too large to be sent by email or other secure electronic means.
- 6.4 Transferring material to removable media is a snapshot of the data at the time it was saved to the media. Adequate labelling must be undertaken so as to easily identify the version of the data, as well as its content.
- 6.5 Files must be deleted from removable media, or the removable media destroyed, when the operational use of the material has been completed. The Council's Records Management and Retention Policy must be implemented by Councillors, employees, volunteers, contractors and other authorised users for all removable media.

7 Security

- 7.1 All storage media must be kept in an appropriately secure and safe environment that avoids physical risk, loss or electrical corruption of the business asset. Due to their small size there is a high risk of the removable media being mislaid lost or damaged, therefore special care is required to physically protect the device and the data. Anyone using removable media to transfer data must consider the most appropriate way to transport the device and be able to demonstrate that they took reasonable care to avoid damage or loss.
- 7.2 Virus Infections must be prevented from damaging the Council's network and computers. Virus and malware checking software approved by the Council, must be operational on both the machine from which the data is taken and the machine on to which the data is to be loaded. The data must be scanned by the virus checking software, before the media is loaded on to the receiving machine.

- 7.3 Any memory stick used in connection with Council equipment or to store Council material should usually be Council owned. However work related data from external sources can be transferred to the Council network using memory sticks that are from trusted sources and have been checked using current anti-virus software.
- 7.4 The Council will not provide support or administrator access for any non-council memory stick.

8 Use of Removable Media

- 8.1 Care must be taken over what data or information is transferred onto removable media. Only the data that is authorised and necessary to be transferred should be saved on to the device.
- 8.2 Council material belongs to the Council and any equipment on which it is held should be under the control of the Council and not available to be used for other purposes that may compromise the data.
- 8.3 Removable media containing Council information must only be connected to Council-owned or Council-managed devices unless there is an identified operational requirement and the use of a personal device has been expressly authorised by the Clerk. In such circumstances, the authorised user must ensure that the personal device complies with the Council's IT Policy and Information Security requirements, and that Council information remains secure, is not copied or retained unnecessarily, and is removed from the personal device as soon as the authorised purpose has been fulfilled.
- 8.4 All data transferred to removable media should be in accordance with an agreed process established by the Council so that material can be traced.
- 8.5 The person arranging the transfer of data must be authorised to make use of, or process that particular data.
- 8.6 Whilst in transit or storage the data must be given appropriate security according to the type of data and its sensitivity.
- 8.7 Encryption must be applied to all removable media used to store Council data. If encryption is not technically available, strong password protection must be applied and the risks documented.

9 Faulty or Unneeded Storage Devices

- 9.1 Damaged or faulty media must not be used. The Clerk must be consulted over any damaged equipment, peripherals or media.
- 9.2 All unneeded or faulty storage devices must be dealt with securely to remove the data before reallocating or disposing of the device. Disposal of removable media must also comply with the Council's IT Policy and Records Management and Retention policy

10 Breach Procedures

- 10.1 Any suspected breach of this policy will be investigated and dealt with in accordance with the individual's relationship with the Council and the relevant policies, procedures or contractual arrangements.
- 10.2 Where a breach of this policy is substantiated, appropriate action may be taken according to the individual's relationship with the Council, including:
- **an employee** – action under the Council's Disciplinary Policy and Procedure;
 - **a Councillor** – referral for consideration under the Council's Code of Conduct and any applicable standards or complaints process;
 - **a volunteer** – appropriate action, including suspension or termination of their volunteering role;
 - **a contractor, consultant, supplier or other third party** – action in accordance with the terms of the relevant contract or service agreement, which may include termination of the contract or other contractual remedies;
 - **any other authorised user** – withdrawal or suspension of access to the Council's information, systems, equipment or facilities, together with any other action considered appropriate.
- 10.3 Where a breach is suspected to involve unlawful activity, the Council reserves the right to report the matter to the appropriate regulatory or law enforcement authorities and to take any additional action necessary to protect its information, systems and services.

11 Review and Revision

- 11.1 This policy will be reviewed annually by the Council and revised according to developments in legislation, guidance, accepted good practice and operational use.

12 Employees Guide in Brief

- 12.1 Data and information are valuable and must be protected.
- 12.2 Only transfer data onto removable media, if you have the authority to do so.
- 12.3 All transfer arrangements carry a risk to the data.
- 12.4 Run the virus checking programme on the removable media each time it is connected to a computer.
- 12.5 Only use approved products for Council data.
- 12.6 Activate encryption on removable media wherever it is available and password protection if not available
- 12.7 Data should be available for automatic back up and not solely saved to removable media.

- 12.8 Delete files from removable media, or destroy the media, after the material has been used for its purpose.
